# Features and Licenses

**EDITOR - DIGITAL DESIGN**
Model all your industrial implementations to enhance performance and project outcomes.

**ACCESS TO THE ELEMENT LIBRARY**
Optimize your simulations with a library of ready-to-use industrial components like conveyors, robots, drives, and more.

**PLC CONNECTIVITY / EMULATION**
Connect PLC programs (Beckhoff, Rockwell, Siemens, etc.) to 3D models to test and refine your systems before commissioning.

**CAD IMPORT**
Import your CAD files, animate them, and integrate them for accurate and realistic equipment simulations.

**TEST CAMPAIGN**
Set up scenarios and test campaigns to validate each step of your projects (commissioning, training, design, flow, etc.).

**MODELING WITH 3D PRIMITIVES**
Easily model custom machines using 3D primitives for fast and precise designs.

**VIRTUAL REALITY (VR)**
Incorporate virtual reality to explore your installations in 3D, validate designs, and create immersive training scenarios.

**I/O CONTROLLER**
Develop your own logic offline or online to create advanced and complex simulations.

**3D INDUSTRIAL MATERIAL EDITOR**
Create realistic simulations using industrial materials for a distinctive and impactful experience.

**ADVANCED ROBOTICS MODULE**
Leverage the advanced robotics module to simulate and program your robots' actions directly within their environment.

**CUSTOM LIBRARY**
Build a dedicated component library for customized simulations tailored to the specific needs of your activities and clients.

**UPDATES AND ROADMAP**
Access the latest advancements and features through regular updates.

**STANDARD SUPPORT AND INITIAL TRAINING**
Receive initial training to help your team quickly master the software, with responsive support and access to dedicated technicians.

**MULTIPLE WORKSTATIONS**
Deploy the software on up to three workstations per license for flexibility suited to your needs.

**PREMIUM TRAINING**
Gain advanced training to enhance expertise and deploy simulation projects tailored to your clients' specific needs.

**PREMIUM SUPPORT**
Benefit from personalized support for implementation, with dedicated experts assisting in complex projects and ensuring a strong return on investment.

**Free License** — "Explore" - Full 3-month evaluation – No initial commitment.

**Enterprise License** — "Full Solution" - Annual license – Updates, Support, Training

**Premium License** — "Dedicated" - Premium Services – Exclusive Support and Training

# Why It Matters ?

**Optimize Your Production**
Start with confidence. Reduce prototyping costs and optimize critical paths to maximize your return on investment.

**Showcase Your Technology**
Leverage realistic simulations to demonstrate the feasibility of your solutions and strengthen your credibility with clients.

**Flexibility and Adaptability**
Model, test, and refine your systems with a scalable platform designed to adapt to your project cycles.

**Save Time, Improve Accuracy**
Control, accelerate, and validate your designs to minimize downtime, streamline commissioning, and optimize workflows..

**Decision Support**
Use real simulations to set up scenarios, evaluate their feasibility, and select the best solutions before committing resources.

**Prepare Teams Risk-free**
Simulate complex scenarios to train your teams safely, reduce errors, and ensure an efficient transition to production.

# Towards the Digital Twin...

# Testimonials

**Olivier Stephan**
**Engineer**

"95% of issues are resolved before we arrive on-site, leaving only minor adjustments. We proceed with confidence. confidence. "

**Francesco Castaldo**
**Automation Engineer**

"With the simulator, we save 60% on commissioning time what took a month now takes just 3 days!"

**Alain. F**
**Industrial Project Manager**

"Simulation reassures our clients. Presenting 3D models upfront convinces them of feasibility and expertise."

**Maxime Huchet**
**Flow Domain Leader**

"Quality is guaranteed. Their expertise and responsiveness make them a trusted partner."

**50%** Faster Commissioning

**30%** Fewer Prototypes and Better Design

**x2** Boost Client Impact

**3d** Onboarding: Ready in 3 Days

**+1500** Projects and Support

**2008** Pioneer in Virtual Commissioning and Simulation
